

How to Play the Game

Welcome to our arcade! Here's a quick guide on how to play our games.

Choosing a Graphical Library and Game

When you first launch the arcade, you'll be presented with a menu where you can choose your graphical library and game. You can use the **ZQSD** keys to navigate and the **Enter** key to make your selection. Pressing **Escape** in the menu will quit the game.

Changing Libraries and Games in Real-Time

You can change your graphical library and game at any time by pressing the **L** key to switch libraries or the **G** key to switch games. Pressing **Escape** will bring you back to the menu where you can make a new selection.

User Input

In the menu, before launching the game, you can enter a username. Your username can be up to 3 letters long. Use the **ZQSD** in the right section of the menu.

Scoreboard

As you play the game, your score will be tracked and displayed on a scoreboard. Try to beat your high score and compete with other players!

We hope you enjoy playing our arcade games. Have fun!
